PROJECTS

E-commerce Web App

An e-commerce web app is an online platform where businesses sell products or services. It provides a user-friendly interface for customers to browse, select items, and make secure payments. Features include product categorization, search, reviews, and customer support.

Pharmacy Management System

A Pharmacy Management System is a digital web application that optimizes pharmacy tasks, including inventory management and prescription processing. It improves efficiency, reduces errors, and enhances customer service by streamlining operations and automating administrative functions.

Weather App

A Weather Web App is an online application that provides real-time weather information. Weather Web App delivers real-time weather updates and forecasts through a user-friendly online platform, helping users plan activities and stay informed about weather conditions in specific regions.

Online Rental Car Management System

An Online Rental Car Management System website enables users to easily browse, book, and pay for rental vehicles online. It streamlines the rental process for customers and businesses, offering a convenient and efficient platform for managing bookings and payments.

Chat Web App API

A Chat Web Application API provides developers with tools to integrate chat functionality into websites or applications. It enables real-time communication, enhancing user interaction and engagement on digital platforms.

Car Wash Management System

A Car Wash Management System automates car wash businesses, handling tasks like scheduling, payments, and inventory tracking. It enhances efficiency and customer service, ensuring a seamless car washing experience.

Tiles and Marble Management System Web App

The Tiles and Marble Management System Web App streamlines inventory, sales, and customer data for businesses in the tiles and marble industry. It ensures efficient operations, superior customer service, and optimized workflow through an easy-to-use web interface.

Online Shopping Website

An online shopping website is a digital platform where users can browse and purchase a variety of products or services over the internet. These websites typically feature a user-friendly interface, product catalog, secure payment options, and order management systems. Customers can shop conveniently from anywhere, explore a wide range of items, add them to a virtual cart, and complete transactions online, making the shopping experience efficient and accessible.
