## Renewable Lighting Factory for Industry Cyber Security Compliance Certification Audit Proposal

We appreciate the opportunity to submit our proposal in connection with providing services known as Agreed Upon Procedures (AUP) for your certification of the IT Security and compliance of the Cyber safety of your systems to deal with Saudi Aramco as your PRINCIPAL ("the Assignment") for your consideration. Our proposal covers the scope of work, our detailed methodology, execution plan, fees and team composition for the proposed assignment.

Baker Tilly Middle East being the accredited Lead Auditor offers Third Party Cybersecurity Standard (TPCS) certification in the Kingdom per the requirements set forth by Saudi Aramco. The proposed certification is a mandatory requirements for those of the vendors who deal with Aramco in order to ensure the minimum Cybersecurity requirements for Saudi Aramco by Third Parties in order to protect from possible cyber threats while simultaneously strengthening the 'Third Parties' security posture for Saudi Aramco.

Baker Tilly in Saudi Arabia is amongst the Accredited Certifying Body for the above certification services as is required by Saudi Aramco. Baker Tilly Middle East with its head quarters in Dubai, UAE operates in the Kingdom under the trade name of Baker Tilly MKM & Co. and has its presence in Riyadh Jeddah and Damam within the kingdom and is the member firm part of Baker Tilly International London, UK which is the world TOP 10 Assurance Advisory & Consulting practice and the network.

Baker Tilly International through its members firms is a US \$ 4 bn practice and operate through 146 countries in the world and has its presence across the globe through 5 regions serving through 750 office locations across every single major economic center in these regions through out the world . The collective strength of Baker Tilly member firms being served through its Partners, Consultants and member's of the team stands today over 36,000.

Within the EMEA regions Baker Tilly Middle East through its trading name as Baker Tilly JFC Group has been ranked as the 6th largest practice including Saudi Arabia. We operate currently as ONE single firm through 30 offices in 12 countries within GCC, the wider Middle East, Africa and Asia, providing a wider range of services which are delivered seamlessly across all offices irrespective of the location of the Practice Leaders .

Baker Tilly Middle East is a Single Window one stop solution provider where every single need of the client is met since the group has several services offerings which includes Assurance ,Risk Advisory including Compliance & Governances ,Direct & Indirect Taxes including Zakat, VAT & Excise Tax, advisory, Corporate Structuring & advisory including Fiduciary services , Corporate Finance including full spectrum of Lead & Transaction Advisory ,Credit Enhancement & Debt syndications ,Recovery Restructuring & Insolvency Business valuations, due diligence, Information Technology Solutions & IT advisory Paralegal including business set up services.

We hope you will find our proposal competitive and also in line with your expectations, and that it will find your acceptance. If you wish to discuss the contents of this proposal or the ICV procedures/calculations further, we are available for the same.

We appreciate the opportunity to submit this proposal and look forward to working with you. We will share a formal Engagement Letter on confirmation of our appointment.

Assuring you of our best services.

# Executive Summary

# Executive Summary

## Agenda

Renewable Lighting Factory for Industry has approached Baker Tilly for assistance in performing its Third Party Cybersecurity Standard (TPCS) that sets forth the minimum Cybersecurity requirements for Saudi Aramco Third Parties to protect Saudi Aramco from possible cyber threats and strengthen Third Parties' security posture.

- Based on the work specified in the Contract, Third Party might fall under more than one classification. In this case ***Renewable Lighting Factory for Industry falls under General requirements***.
- It is the responsibility of the Third Party to ascertain and meet the requirements of this Standard as applicable. Cybersecurity Assessments will be conducted to determine Third Party compliance with Saudi Aramco cybersecurity requirements
- The Cyber Security Compliance Certificate (CCC) will be valid for up to 2 years and is subject to renewal.

Baker Tilly Consulting focuses on delivering the best worldwide proven standards in every project. As such, we have developed techniques of review and appraisal that enable us to efficiently and effectively assess any environment for compliance with accepted best practices, methodologies and standards.

### Team Combination

- An experienced team of financial and sector experts that provide an optimal mix of expertise.
- Access to a regional and international network of subject matter specialists and knowledge database.

### Methodology

- A concise and focused approach, built over a period of 30 years of combined experience in undertaking similar assignments.

### Proposed Compensation

- Our fees is based on time spent and expenses incurred, having regard to the degree of responsibility and skills involved.

# Baker Tilly in the Middle East

# Baker Tilly Middle East

Baker Tilly Middle East (referred to as “Baker Tilly” or “Group”), is a leading professional firm of accountants, business advisors, industrial engineers, and sector specific consultants who all work in a highly dynamic working atmosphere as a group and part of the global network, as a premier independent member of Baker Tilly International.

Baker Tilly, currently headquartered in Dubai, operates through over 30 offices in 12 countries within GCC including the wider Arab & Middle East world and African countries but all as one single firm, served by multicultural partners from various parts of the globe.

The core value of the Group is to provide top-notch services with utmost integrity, loyalty and innovation, and these are the three basic values on which the Group’s activities are based.

Within MEA Region, the group has recently added offices in Yemen, Jordan & Syria, and offices in Libya and Morocco are under establishment. Further, it is in the process of expanding its footprint in Africa with new offices in Ethiopia, Djibouti, Somalia, and Sudan.

Baker Tilly has a strong presence in niche sectors of practice which include Manufacturing, Industrial Engineering, Media, Education, Financial Institutions, Hospitality, Healthcare, FMCG, Logistics & Supply Chain Management.

The team at Baker Tilly JFC consists of over 200 professionals including 25 partners who, through their widespread knowledge and candor, foster an enthusiasm for success and have a widespread experience of providing professional services in the Middle East, catering to over 4,000 individual and corporate clients.

The Group has grown multifold in the last 40 years under the strategic vision of its Peers & Founders and the current serving Group Managing Partner, Mr. Mago JB Singh, who is a Technocrat with extensive experience in Industrial Manufacturing consulting, providing Techo-Economic, Turn Key Solutions, and Investment Banking Services, besides Assurance Services to numerous sectors.

A strong foundation, a dream to grow, a commitment to quality, exceptional client service, technical expertise and above all an international perspective has brought us to where we are today.

**Baker Tilly is ranked 6th in the Middle East in terms of revenue and achieved growth of 7% in 2018 as compared to the previous year**

# Baker Tilly in the Middle East

## Strong Regional Coverage

# Proposed Methodology

# Overall Engagement Approach

Given the previously stated objectives and scope, Baker Tilly has prepared a phased approach to assist Renewable Lighting Factory for Industry in seamlessly performing this engagement. The following approach has been designed to:

# Audit Scope

Baker Tilly shall audit the Third-Party Cybersecurity Controls starting with the general requirements of SAC-002 consisting of 23 controls

## General Requirements

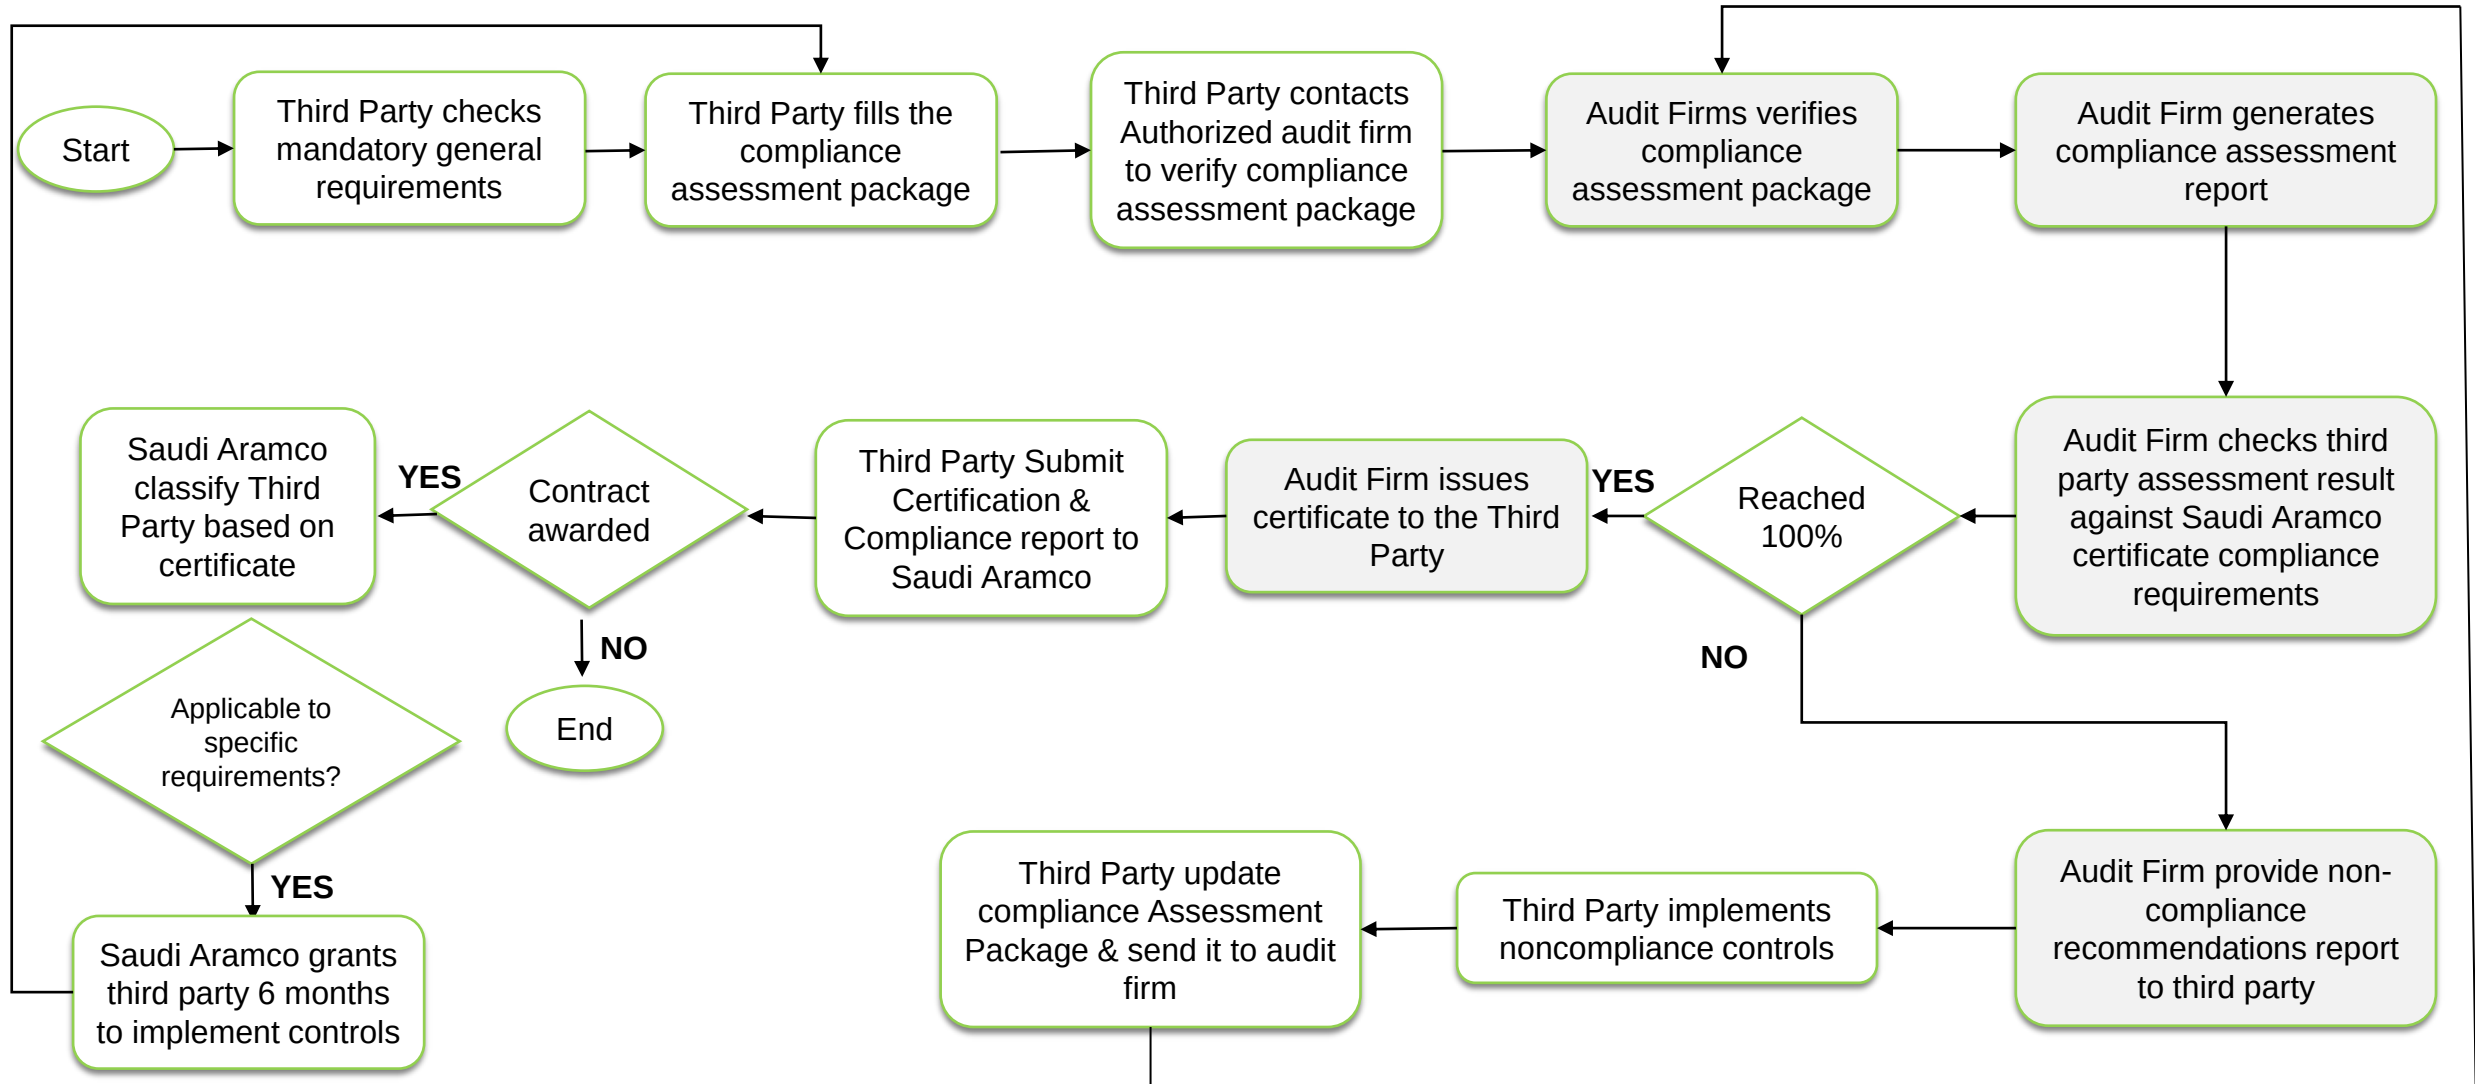

| Section                    | Control Name                                  | Controls |
|----------------------------|-----------------------------------------------|----------|
| Identify                   | Governance                                    | 1        |
| Protect                    | Access Controls                               | 5        |
|                            | Awareness & training                          | 3        |
|                            | Data Security                                 | 8        |
|                            | Information Protection Processes & Procedures | 2        |
|                            | Protective Technology                         | 3        |
| Respond                    | Communications                                | 1        |
| General Requirements Total |                                               | 23       |

All Third Parties must comply with all cybersecurity controls specified in this section.

# CERTIFICATION PROCESS

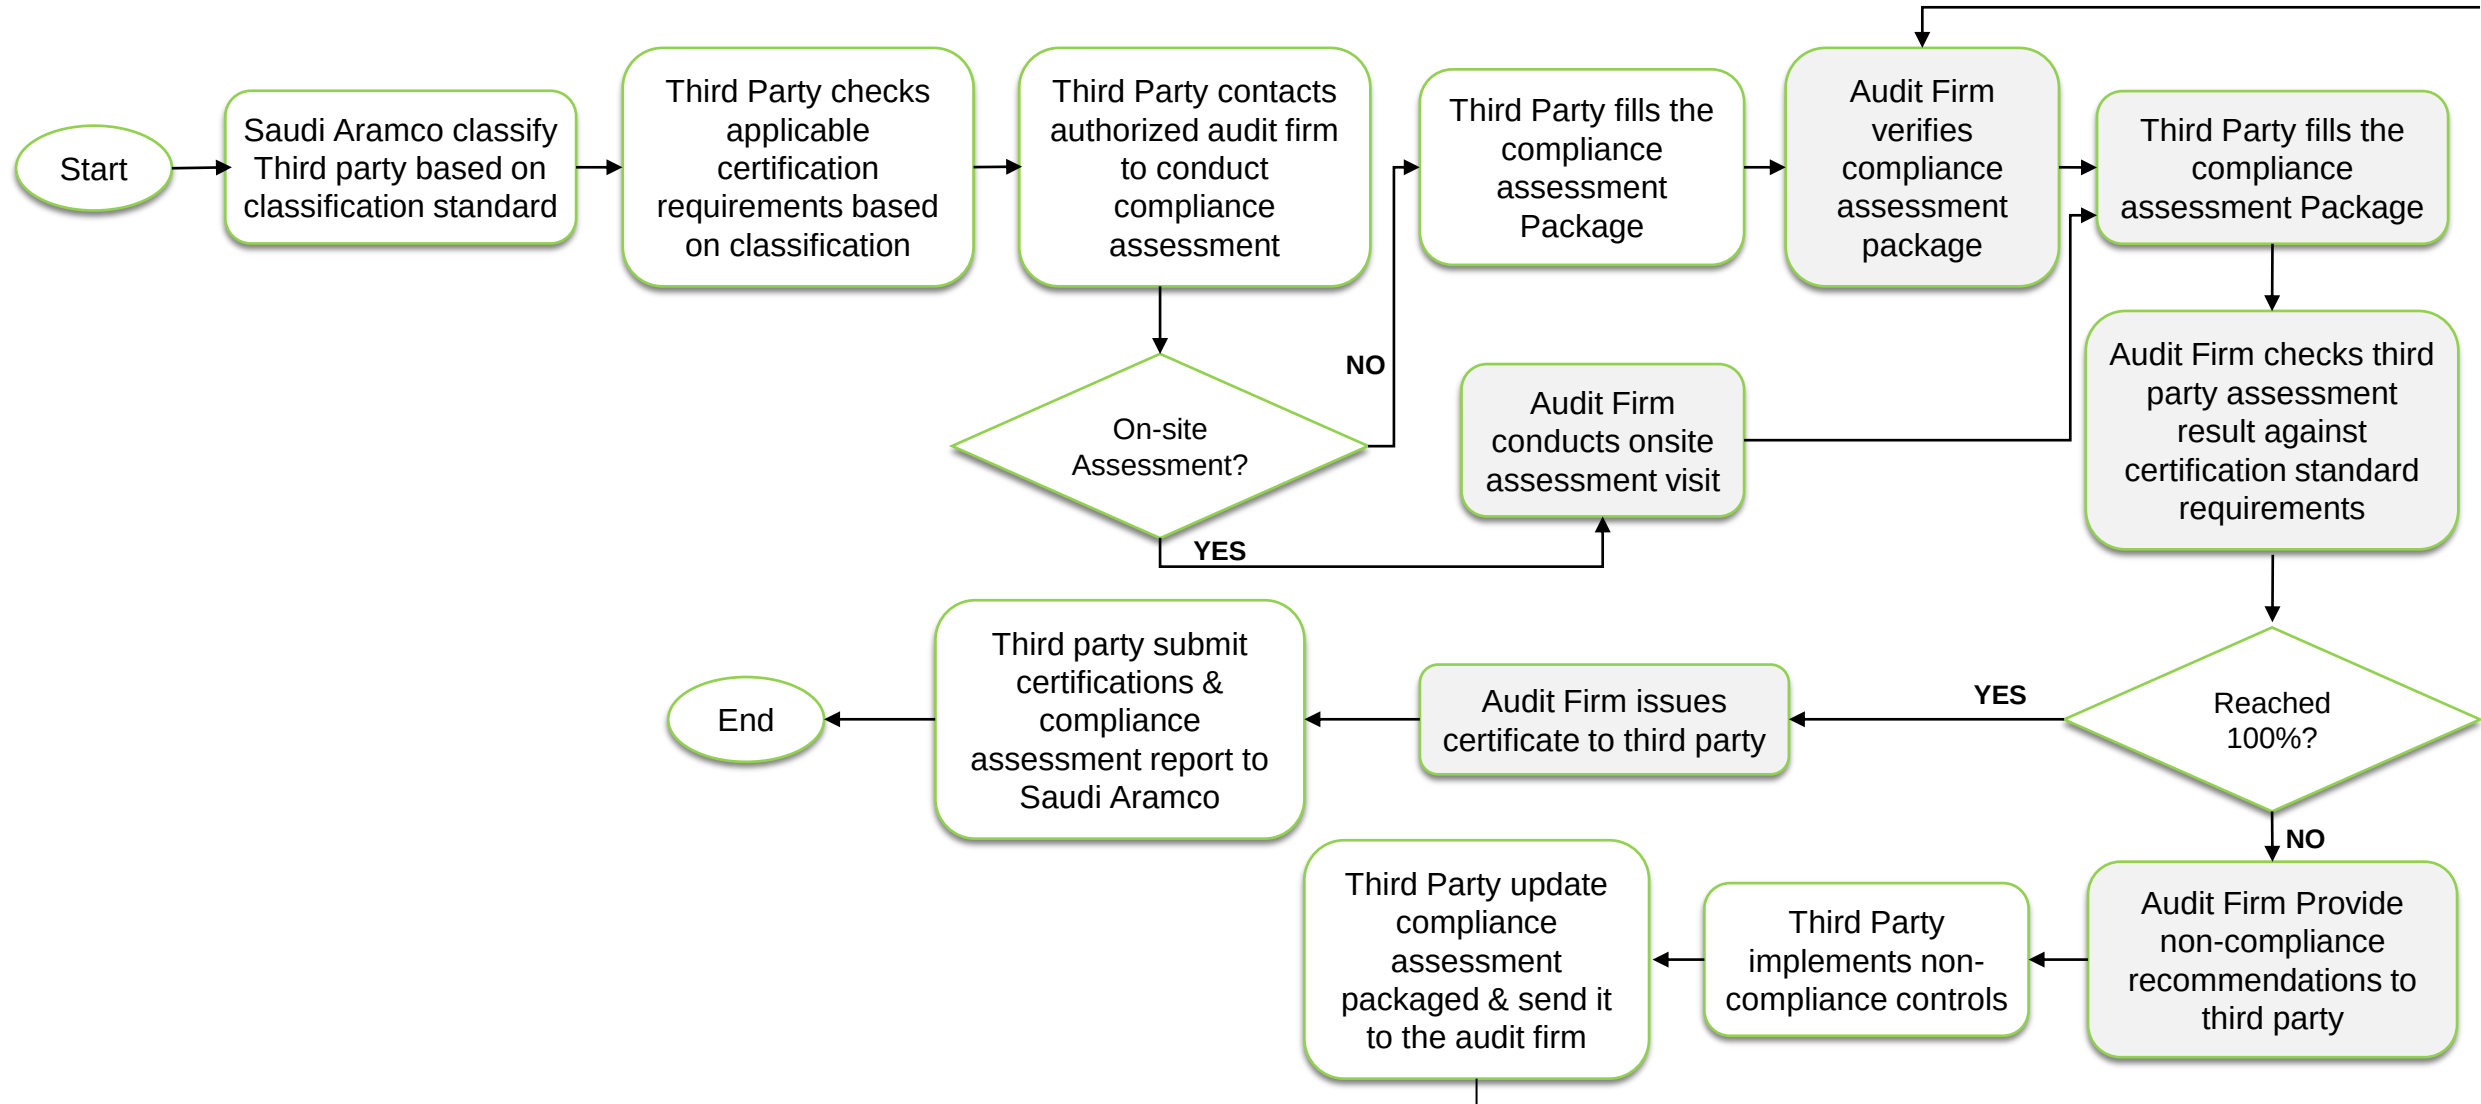

## New Vendors / Before contract awarded

# CERTIFICATION PROCESS

## Existing Vendors / After contract awarded

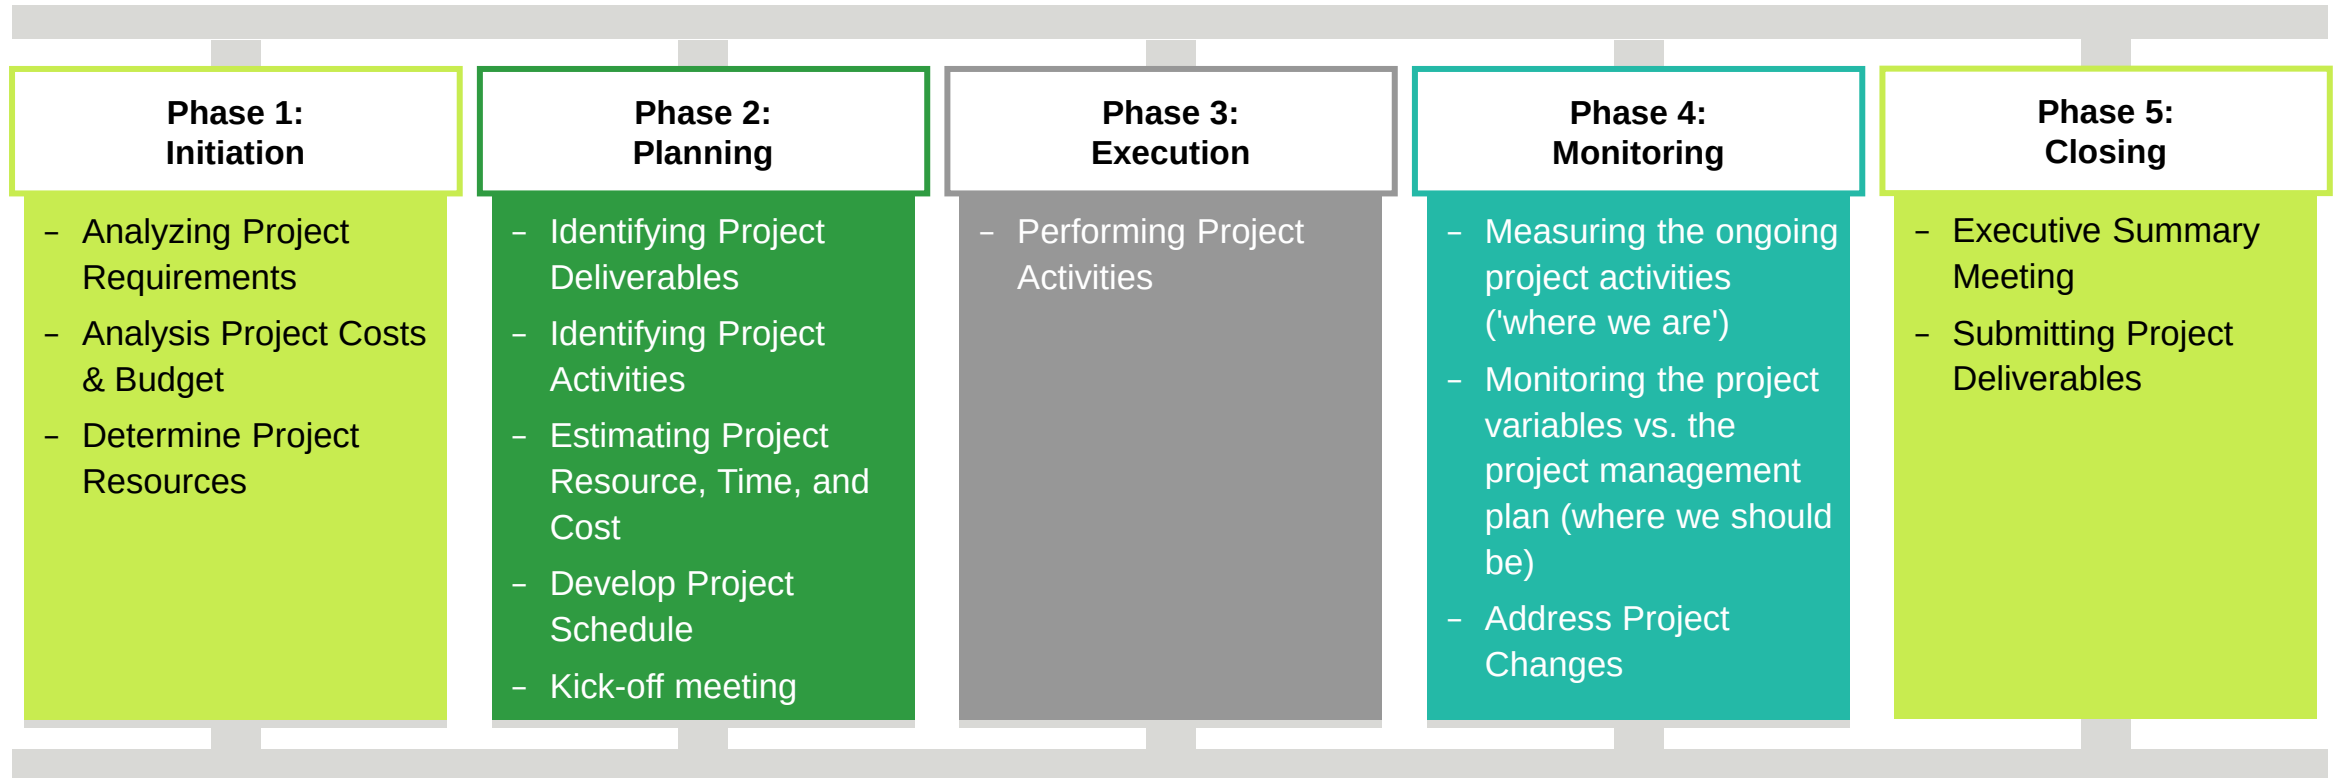

# Project & Quality Management

- Establishing an effective project management structure is crucial for its success. Every project has a need for direction, management, control and communication, using a structure that differs from line management. As a project is normally cross functional and involves partnership, its structure needs to be more flexible, and is likely to require a broad base of skills for a specific period of time. The Baker Tilly Project Management structure consists of roles and responsibilities that bring together the various interests and skills involved in, and required by, the project.
- Our Project Management Methodology will follow the below work flow for each activity:

# Project Management Highlights

## Initiation:

- The initiating processes determine the nature and scope of the project. As it is a first phase of Baker Tilly project management, the key project controls needed here are an understanding of the business environment and making sure that all necessary controls are incorporated into the project. Any obstacles or recommendations will be made to fix them.
- The initiating stage should include a plan that encompasses the following areas:
  - Analyzing the project requirements in measurable goals.
  - Analysis of the costs and benefits including a budget.
  - Determine project resources.
  - Project charter including costs, tasks, deliverables, and schedule.

## Planning:

- After the initiation stage, the project is planned to an appropriate level of detail. The main purpose is to plan time, cost and resources adequately to estimate the work needed and to effectively manage risk during project execution.
- Baker Tilly's project planning phase consists of:
  - Identifying deliverables and creating the work breakdown structure.
  - Identifying the activities needed to complete those deliverables and networking the activities in their logical sequence.
  - Estimating the resource requirements for the activities.
  - Estimating time and cost for activities.
  - Developing the schedule.
  - Conducting kick-off meeting.

# Project Management Highlights

## Execution:

- Baker Tilly's executing phase consists of the processes used to complete the work defined in the project plan to accomplish the project's requirements. Execution process involves resources and people coordination's, as well as integrating and performing the activities of the project in accordance with the project management plan. The deliverables are produced as outputs from the processes performed as defined in the project management plan.

## Monitoring:

- Monitoring and controlling consists of those processes performed to observe project execution so that potential problems can be identified in a timely manner and corrective action can be taken, when necessary, to control the execution of the project. The key benefit is that project performance is observed and measured regularly to identify variances from the project management plan.
- Monitoring and controlling includes:
  - Measuring the ongoing project activities ('where we are').
  - Monitoring the project variables (cost, effort, scope, etc.) against the project management plan and the project performance baseline (where we should be).
  - Influencing the factors that could circumvent integrated change control so only approved changes are implemented.
- In multi-phase projects, Baker Tilly monitoring and control process also provides feedback between project phases, in order to implement corrective or preventive actions to bring the project into compliance with the project management plan.

## Closing:

- Closing includes the formal acceptance of the project and the ending thereof. Baker Tilly activities include:
  - Executive Summary meeting that will sum-up all projects activates that been covered, brief on findings and risks.
  - Submit project deliverables.

# Project Management Approach

- A key element of our client service approach is our strong project management structure. The project plan will be developed using Baker Tilly project management methodologies in collaboration with Renewable Lighting Factory for Industry This will be accomplished through project steps, planning considerations, and adequate components in the project plan.
- We will commit to regular communication in delivering this assignment in a timely and effective manner. We propose:
  - Adhering to a formal project reporting cycle.
  - Recording and monitoring of all issues as required addressing critical issues or exposures before they develop into problems.
  - Developing a detailed project plan specifying key deliverables and milestones with a timetable for completion to be closely monitored.
  - Minimizing surprises in our reports by practicing open communication in relation to findings and recommendations on a real-time basis.

Adhering to a formal project reporting cycle.

Recording and monitoring of all issues as required addressing critical issues or exposures before they develop into problems.

Developing a detailed project plan specifying key deliverables and milestones with a timetable for completion to be closely monitored.

Minimizing surprises in our reports by practicing open communication in relation to findings and recommendations on a real-time basis.

# Assumptions

Our approach assumes the following:

- All our deliverables will be in English.
- Renewable Lighting Factory for Industry will provide Baker Tilly access to your facilities as appropriate for us to carry out our responsibilities.
- Baker Tilly will be responsible for documentation as per the list mentioned here and will not be responsible for the implementation of any of the policies, procedures or guidelines delivered as part of this project.
- Renewable Lighting Factory for Industry will provide Baker Tilly with suitable project room that accommodates comfortably our Team Members with telephone, internet access and access to a printer for the duration of the project.
- Representatives from the Renewable Lighting Factory for Industry will be dedicated to the project and have sufficient authority to manage and approve systems / information access, and access to personnel.
- Baker Tilly will assume that all information and documentation provided by Renewable Lighting Factory for Industry will be complete and accurate.
- Renewable Lighting Factory for Industry will make the necessary interviewees available. Baker Tilly is aware of the constraints on Renewable Lighting Factory for Industry resources and will make every effort to optimize the efficiency of the information gathering process.
- Our ability to complete the work within the timelines indicated and issue our report by the agreed upon dates will depend on the timeliness and extent of cooperation, participation and assistance provided to us by Renewable Lighting Factory for Industry Team.
- It is our practice to bill based on the effort required. While we have made preliminary estimates based on the description provided in the tender, should these estimates require revisions, we will discuss this with you to develop an acceptable resolution prior to proceeding. Further, for any additions / changes to the scope while the project is underway, we will bill the additional items at an extra cost.
- Renewable Lighting Factory for Industry will be responsible for providing Baker Tilly with any existing security documentation, such as, Policies, Procedures, Standards and Guidelines, etc.

# Time Frame

# Assessment

| Assessment Type    | Description                                                                                                         | Applicability                                                                                                                                                              |
|--------------------|---------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Remote Assessment  | A self-compliance assessment against SACS-002 completed by the third party and verified remotely by the audit firm. | <ul style="list-style-type: none"><li>- Outsourced Infrastructure</li><li>- Customized Software</li><li>- General Requirements</li><li>- Cloud Computing Service</li></ul> |
| On-site Assessment | An on-site compliance assessment against SACS-002 conducted by the audit firm.                                      | <ul style="list-style-type: none"><li>- Network Connectivity</li><li>- Critical Data Processor</li></ul>                                                                   |

Refer to executive summary on page 5 or SACS-002 for elaboration on applicability

## Remote Assessment Time Frame

| Assessment Type       | Week 1 | Week 2 | Week 3 | Week 4 |
|-----------------------|--------|--------|--------|--------|
| General Requirements  |        |        |        |        |
| Specific Requirements |        |        |        |        |

**On-Site Assessments** if required by Saudi Aramco will be charged on Man day basis and fee to exclude all out of pocket expenses.

# Professional Fee

# Professional Fee

- Our professional fees are based on the number of man days expected to be incurred to complete the scope described in this Proposal, at our prevailing rates.
- We expect to incur approximately **5 man-days** for General Requirements, after submitting all the controls evidence correctly.

| Sr. No                                              | Description                                                           | Proposed Man days | Fees per Day (SAR) | Discounted Fees (SAR) |
|-----------------------------------------------------|-----------------------------------------------------------------------|-------------------|--------------------|-----------------------|
| 1                                                   | Remote assessment of General Requirements Per Commercial Registration | 5                 | 3,000              | 6,500                 |
| Total will be SAR 8,500 after discount excluded VAT |                                                                       |                   |                    |                       |

Note: In the event complete evidence submission is delayed over 3 months from first submission an additional charges will be issued . General + Specific Requirements would require fee reevaluation.

## Billing Arrangements

- It is our custom to collect our fees for our services as follows:
- 100% in advance upon project initiation
- This proposal and pricing is valid for 30 days.
- Fee excludes VAT and out of pocket expenses.
- If Onsite visit required, an additional fees of SAR 3,000 per visit and it will be charged separately.
- Invoices will be sent according to the above schedule and payments are due upon presentation. In the event of non-payment of any bill, we retain the right to suspend work until payment is received. Fees and expenses for any additional work not included in the scope will be agreed to and billed separately.

# Our Team

# Our Team

**BADER AL TAMIMI**

**Partner**  
SOCPA, CPA (USA)

Over 12 years of specialized experience in:

- Auditing
- Financial and accounting systems development
- Internal control Systems and
- Financial & management consulting

## Professional Experience

- Mr. Al Tamimi is a partner in our Firm. In 2011, he was awarded his Master of Science degree in Financial Analysis from Portland State University (PSU) in Portland, OR – USA. In 2007, he was awarded his bachelor degree in Accounting from King Fahd University of Petroleum & Minerals (KFUPM), Dhahran - Saudi Arabia.
- He is a Certified Public Accountant in Saudi Arabia and USA.
- Mr. Al Tamimi has over seven years of consulting and auditing experience. His earlier experience at one of the big four international accounting firms in Saudi Arabia and at Saudi Aramco have given him vast expertise in auditing, financial and accounting systems development, internal control systems and other financial and management consulting services.
- In the course of his work, Mr. Al Tamimi has been exposed to a wide range of clients in different industries including Manufacturing, Investments, Trading, Insurance, Hospitals, Construction, Hotels, ISP and Not-for Profit Organizations.

# Our Team

**Bader Kamal**

**Engagement Partner**  
CISA, CEH, MCP, MBA

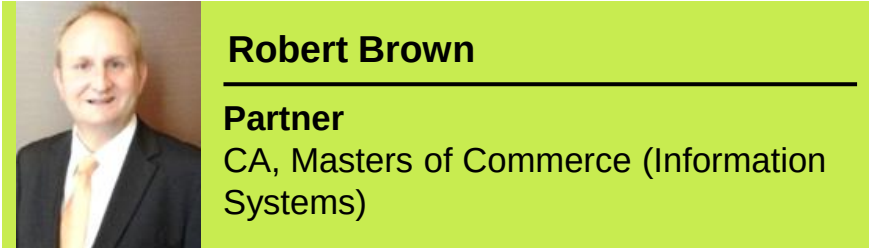

Over 20 years of specialized experience in:

- Performed Information Security Risk Assessments
- Manage Information Security Components
- Manage Information Security Projects
- Design and Implement Network and Security Policies
- Interact with Internal and External Auditors and respond to their review with action plan of closing the finding
- Secure the business environment from external and internal attacks
- Amazon Web Services.

## Professional Experience

- Bader is a Partner in Baker Tilly Consulting. He is a Certified Information Systems Auditor (CISA) with over 20 years of experience in Managing and handling Information Security services.
- He served a variety of clients for different Sectors, like Telecommunication, Banks & Finance sectors. And he is specialized in Vulnerability Assessment, Penetration Test and in managing Information security corporate standards. Furthermore, he is knowledgeable for variety of applications, infrastructure, and security & network technologies.
- He has performed technical reviews of network & security components to evaluate the level of security hardening and the security features activated within Servers, Network and Security devices to ensure they achieve the level of control intended to secure the business operations.
- He has performed vulnerability assessment and penetration testing, Black box, Grey box, and White box security testing, web Application security testing, developed a threat model for monitoring sources that identify vulnerabilities and threats of multinational companies.
- He has also performed wireless penetration testing, tested the organization vulnerability to social engineering attacks using a variety of techniques, such as Telephone, Online, Dumpster Diving, Shoulder Surfing, and Reverse Social engineering and reviewed application upgrade process to ensure completeness and accuracy of migrated data.
- Bader is a certified ISO27001 Information Security Management System lead auditor.
- He is also a certified ISO22301 Business Continuity Management System lead auditor.
- Bader is a certified AWS cloud practitioner upon the arrival of Amazon Web Services to Bahrain.

# Our Team

**Robert Brown**

**Partner**

CA, Masters of Commerce (Information Systems)

Over 28+ years of specialized experience in:

- Internal Audit Standards
- Enterprise Risk Management

- Industry experience includes Financial Services (Banking and Insurance), FMCG, Telecoms, Construction, Retail, MNC's and Government.
- Robert has previously held leadership roles with MNCs such as PwC, Protiviti, BDO, Deloitte and EY.
- He has also worked on advisory assignments including ERP Implementation and Controls Design, Business Process Improvements, Feasibility Studies, Business Plan Preparation, Forensic Assignments, Due Diligence, Deals and Post-Acquisition Integration.

# Our Team

## **Nitin Thakkar**

### **Partner & Subject Matter Specialist – IT and Control Audit**

MCSE (W2K), C.I.S.S.P, C.B.M, C.I.S.A., C.C.A,  
M.C.N.S, C.C.N.P., C.C.D.P., C.C.N.A, C.D.A,  
M.C.S.E, C.N.E, F.C.A, D.T.P, B.Com

Over 30 years of specialized experience in:

- IS Audits
- Financial System Design
- Internal Audits
- External Audits
- IS Internal Controls

## **Professional Experience**

- Nitin has been involved in Information System audit assignments in various sectors such as healthcare, education, manufacturing and trading, construction, non profit organizations.
- He has worked with various organization like Deloitte, Business Brains, Networking computers, and gained experience in financial system design and IS audits.
- Experience in evaluating the effectiveness of IT controls in meeting business and control objectives. Identifying and documenting control and process weaknesses and providing evidential support for findings
- Proposing practical and value added recommendations to address IT control weaknesses and/or process inefficiencies and support to business partners on the creation or modification of policies, procedures, processes, products or services to ensure an appropriate level of internal control and compliance is maintained.

# Our Team

## **Swamy Pentyala**

**Partner - Infotech Solutions & Technology Practice Leader**  
OCP, PMP

Over 20 years of specialized experience in:

- Program & Project Management
- IT Operations Management
- Solution & Service Delivery Management
- Software Development
- Planning and Budgeting
- Business Analysis
- Process Re-engineering
- Solution Design
- System Integration
- Application Migrations
- Database Administration

## **Professional Experience**

- He has invaluable domain expertise across Public Sector, Logistics, Free zones, Investment Authorities, Corporate Shared Services, Retail, Ports, Property, Hospitality, Trade Portals, Healthcare, Hospitality, Oil and Gas all along his tenure with the current and previous engagements.
- He possesses uncanny knack of winning Customer confidence to create common conviction across the board in and value delivery while effectively marshalling in order to ensure thorough participation for effective collaboration of limited resources.
- Mr Swamy has unique blend of commendable persistence, perseverance, persuasive capabilities which were successfully demonstrated in reviving, retrieving and successfully delivering 5 scuttled down ERP implementations during his tenure with Sierra Atlantic (2003 to 2006) and in managing the extensive ERP and system landscape of Dubai World Group of Companies

**Arunabh Srivastava**

**Partner - Technology Solutions & Implementation**

MBA, BTech, PMP

Over 15 years of specialized experience in:

- Business Management
- Marketing, Consulting, Training,
- IT Auditing and Documentation and
- Implementation Works.

## Professional Experience

- Mr Arun has worked on various Implementation, Support, Re-Implementation and Upgrade projects in ERP domain with various roles ranging from Techno-functional Consultant to Solution Architect and Project Manager.
- He has in-depth hands-on experience on most of the Oracle HRMS modules including HR, Payroll, SSHR, Performance Management, Learning Management, iRecruitment, Advanced Benefits and OTL and exposure to Oracle Fusion HCM including Fusion HR, Fusion Payroll, Goal Management, Taleo Recruitment, Taleo Learn and Taleo Onboarding.
- He is a Certified Project Management specialist with strong experience in IT Operations Management, Solution & Service Delivery Management, Software Development, Process Re-engineering, Solution Design, System Integration, and Application Migrations
- He has facilitated organizational process improvements through implementation of appropriate Management Systems for enhancing stakeholder satisfaction and sustainability.
- Involved in swiftly ramping up projects, ensuring deadlines are complied with, achieving optimum resource utilization and cost effectiveness in operations.

# Our Team

## **MOHAMED HALLAK**

### **Manager - Business Development**

BA, CAPM, ISO 9001:2013 Lead Auditor,  
ISO 27001:2013 Lead Auditor

Over 6 years of experience in:

- Manage Information Security & IT Services Projects
- Manage Client Relationship regarding projects
- Interact with Internal and External Auditors and respond to their review with action plan of closing the findings
- Market Exposure
- Market Needs & Analysis
- Latest Security Attack Trends

## **Professional Experience**

- Mohamed Hallak is the Project Manager at Baker Tilly Consulting. Mohamed assures the deliverables are met in a timely manner in the project and applies his experience, exposure to the market and learnt tactics from the Certified Associate in Project Management course into managing of projects carried out by Baker Tilly Consulting.
- His work involves identification of the activities needed, estimating the resource requirements for the activities, estimating time and cost for activities and developing the schedule, monitor progress of assignments, ensure timely and successful delivery and smooth closure of projects.
